## RESEARCH INTEREST

Comment[user3]: Is it possible you can be more specific on these? They sound too generic. You may wish to adjust them to suit the research interest of the faculty/professors you're applying to; in that instance you would have multiple CV's for presentation when required.

Comment[user7]: You'll need to restructure your CV. You would want to move this section upwards after the Education section. Also, you may wish to merge the research interest with the Education or leave it the way it is; in that case you would then need to re-title this section.

Also, your Experience section should come next.

Comment[user8]: From mere observation, this a new font type. Please ensure you have a uniform font type throughout your document.

Comment[user9]: Perhaps, you should bullet-point your research works.

Comment[user10]: Dr.
