

GODSGIFT BRAIMAH

eseoghenabrainmah@gmail.com | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Data Scientist with **5 years** of experience in **machine learning, data analytics, and AI-driven** product development, with a strong foundation in NLP. Proven ability to turn unstructured, multi-domain datasets into data solutions that directly inform product and operational strategy, from exploratory analysis through to production-ready systems. Currently deepening expertise in **deep learning, causal inference, and cloud-based ML pipelines** through the **UBC Master of Data Science program**. Effective collaborator across cross-functional teams, with a track record of communicating technical findings clearly to both technical and non-technical stakeholders.

EDUCATION

Master of Data Science | *University of British Columbia, Vancouver, BC* *Sep 2025 - June 2026*
Bachelor of Structural Engineering (B.Eng.) | *University of Benin, Nigeria* *Sep 2016 - Dec 2022*

SKILLS

Programming Languages: Python, R, SQL (PostgreSQL), NoSQL (MongoDB)
AI & Machine Learning Frameworks: Scikit-learn, PyTorch, Supervised & Unsupervised Learning, NLP, Deep Learning (CNN, RNN, Transformers), Retrieval-Augmented Generation (RAG), Large Language Models (LLMs), Feature Engineering, Hyperparameter Tuning, Dimensionality Reduction.
Cloud & Data Platform: Docker, GitHub Actions, PostgreSQL, MongoDB, DuckDB.
Visualization & Presentation: Altair, Matplotlib, ggplot2, plotly, Tableau, Power BI, Microsoft Excel, Quarto, Shiny & Streamlit.
Core Skills: Data Wrangling & Cleaning, Exploratory Data Analysis, Technical Communication & Data Storytelling, Collaborative Software Development, Version Control (Git/GitHub), Translating Complex Findings for Non-Technical Audiences.

WORK EXPERIENCE

Analytics Manager | [AMDARI INC](#) | *Alberta, CA* *Dec 2024 – May 2025*

- Directed operations for the Remote Apprenticeship Virtual Experience (RAVE) department, leading a **cross-functional team of 12 technical specialists** overseeing **150+ interns**, directed quality assurance for technical case studies and partner projects through performance data analytics.
- Designed and monitored program-level KPIs to evaluate intern performance and business case outcomes, increasing successful **project completion rates by 20%, reducing technical rework cycles** through structured feedback loop.
- Developed and delivered **multi-domain training curricula across data science, analytics, AI**, cutting onboarding time by 35% and standardizing knowledge transfer across 150+ interns, enabling consistent, production-ready project contributions within 12 weeks.

National Mandatory Youth Service to the Nigerian Government (NYSC) | *Lagos, Nigeria* *Mar 2024 – Nov 2024*
Data Scientist | [Data Science Nigeria](#) |

- Performed large-scale preprocessing and exploratory analytics on **RMNCHN (Reproductive, Maternal, Newborn, Child Health, and Nutrition)** datasets, including geo-spatial coordinates, implementing SQL queries and Python-based pipelines to standardize health records and support downstream AI model. Trained a **Naive Bayes classification model achieving 86% test accuracy** to support data-driven health intervention insights **across 44 government** community areas (LGAs).
- Contributed to the development of social-impact AI solutions, including a **Retrieval-Augmented Generation (RAG) system using LLMs** and LangChain for efficient extraction of critical health and spatial indicators.
- Collaborated with the software engineering team **to deploy a data-centered chatbot delivering reproductive and maternal health information**, including an English–Hausa translation module using Google’s Translation API to improve accessibility in **northern Nigeria**.

Junior AI Engineer | [Darey.io Nigeria](#) |

- Engineered **AI-driven skill tracking** and personalized learning systems using **Python, Pandas, Scikit-learn, OpenAI & Claude APIs**, implementing semantic embeddings and cosine similarity for skill matching, and developing an **Employability Index (EI) scoring framework** to support data-driven learner progression for **300+ users**.
- Co-designed AI curriculum and conducted applied research on **emerging LLM and embedding-based methods**, leveraging vector databases (**Chroma**), **prompt engineering, and SQL analytics** to enhance platform recommendation and improve learner engagement outcomes.

Senior Data Scientist | [10Alytics](#) | *United Kingdom* *Sep 2022 – Feb 2024*

- Led the data science division, collaborating with cross-continental teams to deliver analytical and machine learning solutions using (**Pandas, NumPy, Scikit-learn**), **SQL, and supervised learning algorithms (Linear/Logistic Regression, Decision Trees, Random Forests)** to support partner organizations.
- Designed and facilitated technical masterclasses for 1,000+ global participants, covering **data preprocessing, EDA, feature engineering, model training, cross-validation, model evaluation (accuracy, precision, recall, F1-score), and deployment fundamentals** using Scikit-learn and Jupyter/Google Colab environments.

Junior Data Scientist | [10Alytics](#) | *(Sep 2022 – Mar 2023)*

- Provided end-to-end administrative and technical support, developing structured documentation on **data preprocessing, feature engineering techniques, model validation strategies, and basic deployment concepts** to reinforce applied data science principles.
- Coordinated monthly data science cohorts and facilitated technical review sessions across Excel, SQL, Tableau, and Python-based analytics projects, incorporating foundational machine learning workflows using **Scikit-learn for supervised learning tasks**.

NOTABLE PROJECTS

Data Scientist – [Vancouver Neighborhood Safety Application](#) | *Vancouver, BC* *Feb 2026*

- Developed a dashboard to analyze **Vancouver Police Department (VPD) crime data**, using Python and Pandas for data processing, and Shiny, Plotly, and Altair for dynamic visuals to inform data-driven choices for home searchers navigating a **real estate market of over 700,000 people**.

Data Scientist – [You Need a Dictionary Python Package](#) | *Vancouver, BC* *Jan 2026*

- Collaborated with a team of data scientists to develop a Python package ("You Need a Dictionary") that analyzes and visualizes sentiment shifts caused by lexical substitutions in text. Managed the end-to-end package lifecycle using **Hatch and GitHub Workflows for CI/CD**, incorporating **Pytest for automated testing and Quarto** for documentation before publishing to PyPI.

EXTRA-CURRICULAR

Founder | [AI for Kids](#) *Oct 2024 – Present*

- Connecting children to AI solutions by collaborating with schools, charitable organizations and AI developers to implement AI education and technologies that foster growth and empower the next generation.

Co-Organizer | [Google Developers Group Benin](#) *Sep 2022 - Present*

- Provision of hands-on workshops, training, and meetups to foster growth and adeptness with google products and platforms.
